Profile Summary

M.Tech candidate at BITS Pilani (Expected 2027) with hands-on industry exposure in **Java (Spring Boot), Go, and Node.js** through a work-integrated program. Experienced in developing **Model Context Protocol (MCP)** servers and delivering secure, scalable backend systems within Agile SDLC frameworks. Strong problem-solver with **700+** DSA problems solved.

Education

BITS Pilani, Hyderabad Campus — Hyderabad, India
M.Tech in Software Engineering — *Expected Jul 2027*

University College of Engineering, Osmania University — Hyderabad, India
B.E. in Computer Science and Engineering ***(CGPA: 9.09)*** — *Jun 2024*

Technical Skills

Languages: Java (Spring Boot), Go (Golang), C++, JavaScript (ES6+), Python, SQL, HTML/CSS
Web Technologies: Node.js, React.js, FastAPI, Express.js, Microservices, MCP SDK
Databases & Cloud: PostgreSQL, MongoDB, Redis, Docker, Kubernetes, AWS (EC2/S3), CI/CD pipelines
Core Subjects: Data Structures & Algorithms, System Design (LLD/HLD), OS, DBMS, Computer Networks
Developer Tools: Git/GitHub, Postman, VS Code, Linux/Unix, Agile Methodologies, Jira

Experience

The Hackett Group — Aug 2024 – Present
Software Engineer (Work-Integrated, alongside M.Tech) — *Hyderabad, India*

- **Architected a production-grade MCP Server** in Node.js enabling secure, context-aware LLM-to-on-premise communication, establishing a reusable integration pattern for enterprise AI workflows.
- **Built and owned core backend services** for an enterprise Vendor Portal in Go and Java (Spring Boot), supporting transaction processing for **500+ monthly active users** with JWT authentication and RBAC.
- **Improved system throughput** by redesigning Go services with goroutine-based concurrency and refactoring legacy React components into a modular architecture, reducing batch-processing and page load latency.

Key Projects

Full-Stack Fitness Analytics Platform | *MERN Stack, Redis*

- Developed a workout tracking application using **Node.js** and **React**, featuring interactive progress charts and activity logs.
- Designed a normalized **MongoDB** schema and integrated **Redis** for session caching to improve query response times for analytics.

AI Pipeline Visual Builder | *React, React Flow, Zustand, FastAPI*

- Built a drag-and-drop node interface using **React Flow**, featuring dynamic state management with **Zustand** and automated handle generation to simplify the UI.
- Developed a **FastAPI** backend to parse pipeline architectures, implementing a DFS algorithm to ensure graph validity and detect cycles.

IoT-Based Plant Disease Classifier | *Python, Computer Vision, Cloud*

- **Awarded Best Project:** Built an IoT system to detect plant diseases in real-time using CNN-based Machine Learning models and cloud-based data synchronization.
- Created a mobile dashboard for greenhouse operators to monitor plant health and receive real-time updates via remote cloud services.

Achievements

Coding & Rankings: Solved **700+** problems on LeetCode/GFG; Secured State Rank **402** in TG EAPCET.
Competitions: Secured **3rd Rank** in Smart India Hackathon (College Level Selection Phase).
Certification: Google IT Automation with Python Professional Certificate; AWS Certified Cloud Practitioner.
